Technical Summary

Some of my technical capabilities are listed below. These are meant to illustrate a range of skills, and this set of tools is not necessarily all-encompassing.

Languages

- *Javascript*
- *HTML*
- *CSS*
- *NodeJS*
- *PHP*
- *Java*
- *C#*

Technologies

- *jQuery*
- *Greensock*
- *Handlebars*
- *AngularJS*
- *Grunt*
- *Databases (Mongo, MySQL)*
- *WinJS*

Process

- *Localization*
- *Version Control*
- *Agile*
- *Scrum*

Tooling

- *CSS Pre-processors*
- *Build Tools*
- *Custom/Open Source*

Soft Skills

- *Cross Disciplined*
- *Team Management*
- *Client Management*
- *Project Scoping*

Spoken Languages

- *English*
- *Spanish*
- *Portuguese*

Professional Experience

I am a developer that has worked as a sole proprietor, in various small startups as co-owner/founder as well as CTO, and on enterprise-scale, internationally distributed teams at agencies. A broad range of experience from the business leadership and management side to the technical execution side including dev-ops, design, CR/UX, BA and development give me a well-rounded perspective of process and execution. I bring critical, out-of-the-box thinking, attention to detail, and a drive for excellence to the table. Most importantly, I never want to stop learning.

Razorfish

Presentation Layer Architect
June 2013 – Present

Notable Clients:
Intel, Microsoft (various groups), Xbox.com, Patrón Tequila

Duties:
Write/manage code bases, design early-stage project architecture, execute projects, assist in or perform technical integrations, project/team management, client engagement, perform technical assessments for RFIs, perform interviews and monitor staffing requirements, project scoping, help CR/UX/non-technical teams interface with engineering teams.

Major Accomplishments:
- Led Intel.com global development effort for 2015/2016 rebrand across international properties.
- Helped foster better business relationships between Razorfish and clients such as Intel, Xbox, and Microsoft by providing technology solutions and client engagement that exceeded expectations of the client.
- Led Microsoft Health front-end development team in the development of the v1.0 application of the Microsoft Band fitness tracker's online dashboard.
- Managed Xbox.com's primary infrastructure and oversaw or directly built a large number of major title campaign experiences on Xbox.com for both Xbox 360 and Xbox One.
- Team lead for all Xbox One technology solutions on Xbox.com leading up to and through the November 2013 Xbox One launch.

Globant

Senior Presentation Layer Engineer
Sept 2012 – March 2013

Notable Clients:
Intel, Microsoft (various groups), Xbox.com, Patrón Tequila

Duties:
Write code to support any project requirements per client briefs. Provide technical assessment where necessary. Provide language assistance to translate between English and Spanish for client and agency teams.

Major Accomplishments:
- Developer for rebuild of major fashion brand website Express.com
- Developer for Windows 8 "About Me" application (Windows Metro), launched in over 120 countries in a huge number of languages.

Mutual Auto Media

CTO
December 2009 – March 2012

Notable Clients:
Pierre Money Mart, Zein Auto Group, Walker Subaru (Major Seattle area dealerships)

Duties:
Design, plan and executed company's digital strategy around online systems including dealership inventory management, client website design/build/deployment, third party data integration with Mutual Auto servers, lead generation management, and designed and built client "console" manager application.

Major Accomplishments:
- Designed, built, and maintained all full-stack technical infrastructure for online operations.
- Managed company's creative team and oversaw web application and marketing materials design department.

Education

B.A. – Spanish Language and Literature – *Western Washington University – 2004–2008*
Status: Complete

B.A. – Visual Design – *Western Washington University – 2008–2010*
Status: Incomplete – stopped attending to become CTO/Brand Manager at a startup called YachtVid.
